

VITTORIA ENERGY EXPEDITION

April 25, 2018

Washington, DC

Vittoria Energy Expedition partners with CARTO to bring mapping and location intelligence to renewable energy discussion in post-Hurricane Maria Puerto Rico.

Today, Vittoria Energy Expedition (VEE) announced a partnership with CARTO, the leader in location intelligence, to chart the status and progress of renewables in post-Hurricane Maria. The interactive, media-rich product will be the first of its kind providing site information for Puerto Rico's utility-scale solar and wind power facilities – including hurricane impact assessments and operational status reports – as well as off-grid solar projects powering critical community services through recovery. VEE visited Puerto Rico in the aftermath of Hurricane Maria and crisscrossed the island documenting the state of renewables.

“We couldn't be more excited to work with CARTO on developing this great tool. A lot of the focus on Puerto Rico post-hurricane has been aimed at energy resilience and infrastructure. Renewables have and will play a positive role in this story. We are looking for ways to put that story in front of experts, policy makers, energy developers and public audiences in an understandable and interactive way,” said Nathan Sermonis, Co-Founder and President of VEE. “Partnering with CARTO, a preeminent leader in digital mapping, will make that possible. The story needs to be told, and this will be a big part of making that happen. We will be visualizing the reality for the world to explore.”

Vittoria Energy Expedition is a travel-inspired nonprofit organization connecting everyday people with current renewable energy innovations that not only fuel, but empower lives. Team Vittoria works at the intersection of technology, business, and policy to inform public discussion around energy decisions at home and in our communities. www.vittoriaenergy.org

CARTO leads the world of location intelligence, empowering any organization and individual to discover and predict key insights through location data. With CARTO's intuitive location intelligence platform, analysts and developers build self-service location based apps that help optimize operational performance, strategic investments, and everyday decisions. <https://carto.com/>
